## SKILLS

**Proficient** Python, LangChain, FastAPI, Angular, Node.js, Playwright, Pytest, SQL, NLP, LLMs, RAG, Pinecone  
**Familiar** React, Azure, Snowflake, Tableau, spaCy, OpenAI API, Docker, Git, GitLab CI/CD

## EXPERIENCE

**Software Engineer — AI & Full Stack Developer** June 2025 – Present  
Synechron | Client: Mizuho Americas *Pune*

### *IG Syndicate Application*

- Maintained 99.9% uptime on a live investment-grade bond syndication platform by resolving critical production incidents and delivering feature enhancements for real-time capital markets operations
- Shipped full-stack features across Python, Node.js, and Angular in bi-weekly sprints, cutting feature delivery time by ~20% via reusable component architecture and REST API optimisation

### *Banking MMM Application*

- Built a Playwright + Pytest test automation framework achieving 93% coverage and reducing regression defect rate by 40%; maintained financial analytics platform serving 6 business domains
- Developed a Python pipeline to auto-generate PowerPoint reports, eliminating 8+ hours of manual effort per weekly reporting cycle

**Data Analyst Intern** Jun 2024 – Dec 2024  
Schneider Electric *Mumbai*

- Deployed an automated PDF-to-Excel extraction pipeline using NLP (NER), cutting manual processing effort by 70% and enabling 3× document throughput per week
- Developed an LLM + LangChain AI chatbot for internal query resolution, reducing response time by 65% and deflecting ~30 ad hoc analyst requests weekly

## PROJECTS

**Visual Alchemy** [\[GitHub\]](#)  
Computer vision pipeline enhancing monocular videos with depth-based effects — parallax, lighting, blur, and anaglyph 3D conversion using depth estimation and OpenCV. Deployed as a Streamlit web app with real-time effect selection.

**Resume Analyzer** [\[GitHub\]](#)  
NLP + LLM resume parser (spaCy, LangChain) achieving 89% accuracy on skill extraction. FastAPI backend + React frontend with real-time analysis.

**Multiple Bank Management** [\[GitHub\]](#)  
Custom stack-based data structure in Java with  $O(\log n)$  transaction processing — **1st place**, Custom Data Structures, [College Name] Annual DSA Competition (20XX), 75+ teams.
